and **Productivity**
meets **Progress**

Committed to You

Transforming Businesses with Cutting-Edge Solutions

Welcome to HALO, where innovation meets infrastructure, and productivity meets progress. We are more than just a service provider we're your strategic partner in navigating the evolving landscape of technology. Explore how our comprehensive services in Datacenter as a Service (DCaaS) and End-User Devices (Tablets) as a Service can empower your business for success.

Customer-Centric Approach

Your success story is our primary focus. We pride ourselves on understanding the unique needs of each client. Our customer-centric approach means that every solution we provide is tailored to your business, ensuring a perfect fit that fosters growth and efficiency.

What Sets Us Apart?

Innovation at the Core

Innovation is the heartbeat of HALO. We don't just keep pace with technological advancements; we lead the way. By leveraging the latest in datacenter technologies and end-user devices, we empower businesses to stay ahead of the curve in an ever-evolving digital landscape.

Cutting Edge Sustainability in Everything

At HALO International, we are committed to fostering a sustainable future and prioritizing environmental stewardship in all aspects of our operations. With a steadfast dedication to innovation and responsibility, we integrate sustainable practices into our business model, striving to minimize our ecological foot print while maximizing positive impact. Through conscious decision-making, resource efficiency and continual improvement, we aim to lead by example in preserving our planet for generations to come. Together, we embrace the challenge of sustainability, driving positive change and shaping a brighter, more environmentally conscious world.

Digital transformation is the single most important driver of next-generation businesses.

Competitors, new disruptive entrants and evolving customer demands are forcing businesses to transform to better respond to market trends. Budget constraints and a lack of buy-in, resources and technical expertise are hurdles that stand in the way of embracing truly digitised business operations.

Digital transformation initiatives support economic development, such as digital infrastructure investments, business-friendly online portals and streamlined permitting processes that can attract investment and foster business growth for increased tax revenues.

Governments - Enhancing Services, Increasing Revenue & Realizing Security

Digital transformation is crucial for government agencies at all levels. It enables them to enhance efficiency, transparency and citizen engagement while addressing modern challenges effectively.

Efficiency and Cost Savings

Digitizing processes and services can streamline operations, reduce administrative costs, improve resource allocation, automate repetitive tasks and reduce paperwork

Improved Service Delivery

Enhancing the quality and accessibility of services provided to citizens through online portals, mobile applications and digital communication channels.

Improved Tax Collection

Make it easier for citizens and businesses to comply with tax obligations. Online tax filing systems, automated reminders and data analytics can help identify tax evaders and reduce tax evasion, increasing revenue collection.

Enhanced Transparency and Accountability

Makes government processes and information more accessible to the public.

Next Generation Education

Our solutions embed advantages for education, revolutionizing teaching and learning experiences:

Preparation for the Future Workforce

Digital literacy and proficiency are essential skills for success in the 21st-century workforce. Our integrated solutions for education equips students with the technological skills, critical thinking abilities and adaptability needed to thrive in a digital and interconnected world.

Enhanced Access to Education

Enable access to education for students regardless of their location.

Engaging Learning Experiences

Interactive multimedia content, gamified learning activities, and immersive simulations to enhance student engagement and motivation.

Collaborative Learning

Digital platforms facilitate collaboration and communication among students and teachers, regardless of physical location.

Efficient Administration and Management

Streamline administrative tasks, such as student enrollment, attendance tracking, grading and course scheduling

Integrated learning management systems (LMS) automate routine processes, freeing up educators time to focus on teaching and student support.

Accessibility and Inclusivity

Promotes accessibility and inclusivity by accommodating diverse learner needs and preferences.

HALO

HALO INTERNATIONAL FZE

Leadership in Energy and Environmental Design (LEED) is the world's most widely used green building rating system, providing the tools for professionals to decrease the environmental impact and cost of building design, construction, operations, and performance.

Uptime Institute is the Standard bearer for Digital Infrastructure performance. Their Tier Standard has been used in the design, construction, and operations of thousands of sites in more than 114 countries.

ISO 50001 provides a framework to support organizations in all sectors to use energy more efficiently through the development of an energy Management System including energy efficiency, energy security, energy use and consumption.

Estidama means 'Sustainability' in Arabic. The Pearl Community Rating System (PCRS) was developed as the first sustainability assessment tool in the Middle East and considers the United Arab Emirates spatial and cultural dimensions.

ISO 27001:2022 addresses emerging technologies such as cloud computing, IoT, and AI, acknowledging their relevance in modern information security. Organizations are better equipped to protect their data and adapt to the ever-evolving threat landscape.

Lean focuses on waste reduction. Six Sigma emphasizes variation reduction. Lean achieves its goals by using less technical tools such as kaizen, workplace organization, and visual controls. Six Sigma uses statistical data analysis, design of experiments, and hypothesis testing.

Our Story

HALO is a leading technology solutions provider with a focus on delivering innovative and cutting-edge solutions to businesses across industries. Founded on the principles of excellence, innovation and customer satisfaction, HALO has quickly established itself as a trusted partner for businesses looking to embrace digital transformation and drive growth.

Our Values

Innovation: We are committed to innovation, constantly seeking new ways to enhance our services and solutions.

Excellence: We strive for excellence in everything we do, delivering high-quality solutions that exceed our clients expectations.

Customer-Centric: Our clients are at the heart of everything we do. We work closely with them to understand their needs and deliver solutions that meet and exceed their expectations.

Integrity: We conduct business with the highest standards of integrity and ethics, building trust with our clients and partners.

Our Mission

At HALO, our mission is to empower businesses with the latest in technology and innovation, enabling them to stay ahead of the competition and achieve their strategic objectives. We are committed to delivering high-quality, tailored solutions that address the unique needs of each client, driving tangible results and business success.

HALO INTERNATIONAL FZE

Website: www.halointernational.ae

Address: 513964, SAIF Zone Executive office P8-01-21, SAIF Zone, Sharjah, UAE

Our Services

Datacenter as a Service (DCaaS)

Tailored solutions allowing dynamic adjustments in infrastructure capacity based on business demands, allowing users to scale up or down without compromising performance.

Security

Comprehensive cyber security consulting services to assess, enhance and maintain robust security postures ensuring high availability and minimizing downtime.

Disaster Recovery as a Service (DRaaS)

Robust disaster recovery solutions for data protection and business continuity.

Custom Application Development:

End-to-end custom application development services catering to unique business requirements

Managed Data Services

Services to ensure the integrity, security and accessibility to data.

Data-Driven Decision Support

Advanced analytics to derive actionable insights.

Technology Alignment Consultancy:

Expert guidance on selecting, implementing and optimizing technology solutions, ensuring alignment with business objectives and maximize the value of technological investments.

Leading-Edge Green Why Choose HALO?

Our commitment to sustainability goes beyond compliance; it's ingrained in our corporate DNA. We continuously seek out leading-edge green technologies and practices to minimize our environmental footprint and maximize positive impact.

But our dedication doesn't stop there. We believe in fostering a culture of sustainability throughout our organization and inspiring others to join us on this journey. By engaging our employees, customers, suppliers and communities, we aim to create a ripple effect of positive change that extends far beyond our walls.

Together, we're not just building a business; we're building a better, more sustainable world for future generations. At HALO International, sustainability isn't just a goal – it's our guiding principle, driving us to innovate, collaborate and lead the way towards a greener, more sustainable future.

HALO Green Investments

Our leading edge green investments are helping to:

- Create next generation, extremely low-power, carbon-neutral super-computing.
- Efficiently recycling atmospheric carbon dioxide to sustainable green power fuels.
- Converting bio waste to fertilizer.

End-to-End Technology Solutions

Comprehensive services covering datacenter infrastructure, tablets, specialized solutions and application development.

Proactive Scalability and Security

Scalable robust cybersecurity measures that grow with your business needs.

Centralized Data Management

Streamlined data management with centralized storage solutions for optimized access and scalability.

Digital Transformation Consultancy

Expert guidance for businesses to leverage technology, streamline processes and achieve strategic goals.

Tailored Application Development

Custom application development services designed for optimal performance and unique business requirements.

Green as a Core Principle

Green Solutions encompass environmentally friendly practices, products and technologies aimed at reducing carbon footprint.

Leading Edge Investments

We don't follow, we lead! Our investments enhance your ability to stay at the forefront of technology.

Extended Support and Warranty Options

Providing additional support plans and warranty options for enhanced device protection.
